

EVALUATION ON STUDENT PROGRESS

Provide a self-evaluation of your performance, using the measures previously identified, in applying and acquiring new knowledge, skills, and competencies identified in the Training Plan for STEM OPT Students. Discuss accomplishments, successful projects, overall contributions, etc., during this review period. Address whether there are any modifications to the objectives and goals for projects, or new areas for skill and competency development.

Range of Evaluation Dates: From (mm-dd-yyyy): 07/01/2025 To (mm-dd-yyyy): 06/30/2026

During this evaluation period, I applied and expanded the knowledge gained through my STEM degree while working as a System Testing Analyst II. My responsibilities included developing and executing test cases, performing functional, integration, regression, and claims testing, validating business requirements, and supporting software releases for healthcare and insurance applications. I collaborated with business analysts, developers, providers, and third-party vendors to ensure application quality and system reliability.

I gained hands-on experience with API integration projects by validating data exchanges between internal and external systems using Postman and SOAP UI. I also investigated and resolved production issues reported by providers and third-party vendors, performed backend data validation using SQL, and supported data reconciliation activities. Additionally, I utilized tools such as Jira, Azure DevOps, and Power BI to support testing and quality assurance processes.

Through these experiences, I strengthened my technical, analytical, and problem-solving skills while gaining deeper knowledge of software testing methodologies, healthcare claims processing, system integrations, and quality assurance best practices. The objectives outlined in my STEM OPT Training Plan have been successfully achieved, and I will continue to develop expertise in test automation, API testing, and advanced quality engineering practices.
